Prince's Annual Catalogue

of

Fruit and Ornamental

Trees and Plants,

Cultivated and for Sale at the

Linnæan Botanic Garden & Nurseries,

All Orders are to be addressed to

WILLIAM R. PRINCE & Co., only,

No other resident of Flushing being authorized to receive any Orders whatever for this Establishment.

"A wood coeval with himself he sees,
And loves his own cotemporary tree."

NEW-YORK:
PRINTED BY WILLIAM S. DORR,
No. 123 Fulton Street.
1841.

FRAUD AND DECEPTION.

The Subscribers caution the public against a spurious catalogue, pretending to emanate from this establishment, issued by a Mr. Garretson, (formerly a clerk in their employ) but who has no authority whatever to use their names or the name of this establishment, and they disclaim all connection with him of any kind whatever, and any such use of our names is a fraud upon us and a deception on the public.

FRAUD AND DECEPTION.
The Subscribers caution the public against a spurious catalogue, pretending to emanate from this establishment, issued by a Mr. Garretson, (formerly a clerk in their employ) but who has no authority whatever to use their names or the name of this establishment, and they disclaim all connection with him of any kind whatever, and any such use of our names is a fraud upon us and a deception on the public.

WILLIAM PRINCE.
ALFRED S. PRINCE.
PREFACE.

This establishment being but eight miles from the city of New-York, with a steamboat and stages making several trips daily between the two places, offers every advantage that would be possessed by a city location; and an office and agency is also established in the city to expedite the business.

The Proprietors in tendering their new Catalogue with reduced prices, desire to state that their Fruit and Ornamental Trees, &c. are nearly all of large size and vigorous growth. The establishment contains at the present period more than a million of Trees and Plants, and the Proprietors are willing to enter into liberal arrangements, both as to prices and credit, with all such persons as desire large quantities of Trees, &c. and to the proprietors of Nurseries who wish to extend their collections, and such other persons as may wish to establish new Nurseries, they will make liberal discounts from the usual prices. Any persons who are desirous to act as Agents in towns where no agency at present exists, will please communicate their views in regard thereto.

The fruit trees in the catalogue are either grafted or inoculated, and are propagated from such European and American kinds as have acquired a well merited celebrity, the whole collection of which has recently undergone a most careful revision, and the selections have been made with great care and attention. Every precaution is taken which is necessary to preserve the different varieties completely distinct, and all the Peach and other trees are perfectly healthy, and free from disease. Many persons, however, are apt to purchase trees without regard to any point but their cheapness, and not unfrequently, after the tool and experience of years, find them, when they arrive at bearing, absolutely worthless. Others who regard the price only, pay no attention to the size and vigor of the trees, and consequently sacrifice many years uselessly before their orchards come into bearing. The strongest proofs the Proprietors can give is the table of their anxiety to guard against misconception are the precise descriptions contained in the Treatise recently published, and other works of a similar character, in which they are now engaged; the result of which will be, that any person, however ignorant on the subject, cannot fail to know if he has been deceived.

In regard to the identity of the various kinds of fruit, the Proprietors do not pretend to a perfect infallibility, but they do constantly aim at it at all, and therefore if an inadvertent error occasionally arise, it is because their unwearying scrutiny has not been able to guard against it.

One great advantage possessed by the trees sent from this establishment, is their particular hardiness. From the proximity of the nurseries to the ocean on one side, and to the East River on the other, with a free and open exposure to all winds, accompanied by the particular advantage of being so far north as to acclimatize the trees to any still more northern section of our country, they acquire a degree of hardiness which renders them extremely eligible for colder latitudes, and to support the rigor of less favored regions, and trees thus hardened by nature are also found to succeed best in our Southern States. It is doubtless to these causes that is to be attributed the general success which has attended the trees sent from this establishment, when transmitted to Nova Scotia, the Canadas, &c. and the winter of 1831-2 incontestably proved their superior hardiness, they having withstood the severity of that season uninjured, while immense numbers of trees elsewhere in the middle and in the eastern states, were destroyed thereby.

Specimen trees of every variety of fruit comprised in this catalogue, are now standing in the experimental orchards of the establishment, and all the kinds are ready for sale. The stock of some of the newest sorts, however, is limited, and the trees, in consequence of their recent introduction are of less size. Many other varieties will be new and hereafter in a Supplementary Catalogue, additional time being necessary as well for the propagation, as for judicious investigations. New fruits are not added to the collection merely, because their names differ, but a selection is made of those on which merit and have received the encomiums of persons acquainted with the subject.

A large number of the apples are the same as described by Mr. Coxe, and the Treatise on Fruits or Pomological Manual, contains descriptions of near 500 varieties of the different fruits.

It seems almost superfluous to remark, that the trees and plants in this catalogue are particularly designated as tender, are hardy.

Every tree when sent forth from the garden, is duly labelled; and from fifteen to thirty trees are usually packed in each bound bundle, and where boxes are preferable, from 50 to 100 Trees and Shrubs can be packed in each.

Where trees are requested for exportation, they are carefully packed in matts,
boxes, or casks, so as to be sent to Europe, the West Indies, or any part of America, with perfect safety for which a reasonable charge is made.

All packages of trees are delivered at Fulton-market wharf, New-York, by water, free of freight and, when desired by persons at a distance, they will be shipped to any port they may designate, and agreements have been made with the lines of packets to Boston, Baltimore, Washington, Richmond, Charleston, Savannah, &c. to take bundles of trees at very moderate freights. It is desired to be transmitted to Philadelphia, they can be sent there by the transportation line in one day, and the canals now forming in every section of the country, present cheap and easy modes of conveyance. No care is wanting on the part of the proprietors to give such directions as may cause them to arrive safely; but it is to be expressly understood, that after being thus delivered or shipped at New-York, they are wholly at the risk of the person who ordered them. Insurance against loss by sea will be effected whenever request is made.

To such persons as desire fruit trees, &c., and are not themselves acquainted with the qualities of the different kinds, it is recommended that they specify in their orders the number of trees wanted of each species of fruit, and leave the selections to the proprietors, who will make it according to the views and tastes of the applicants; and in such cases they may rely that there only will be sent which are of the most approved kinds; and, when desired, those that will ripen in succession, and larger trees can generally be selected in such cases. They can, however, if the party prefer it, obtain all the necessary information by referring to the "Treatise on Fruits." &c.

It is also well, where the orders are small, to unite those of several neighbors in one, which will both abridge the trouble of execution and the expense of packing and transportation; and, as each tree is labelled, it can cause no confusion.

Persons who may wish to make selections of fruits of American origin, will find them particularly ingenious. It sometimes happens that the demands for particular kinds of fruit trees are so much greater than anticipated, that it renders those kinds for the moment comparatively scarce, except such as are of small size. In these cases, in order to prevent any delay, it would be well if the orders should authorize, that such kinds may be replaced by others of equal quality, which will be executed in a manner worthy of the confidence reposed.

American Indigeneous Trees, Shrubs, and Plants, or their seeds, suitable for sending to Europe, will be supplied in assortments, from five to one thousand dollars or more, as enumerated in Catalogue No. 4.

The proper season for transplanting trees, are the months of October, November, and December, in autumn; and March and April in the spring. For bulbous flower roots, the best season is from July to November inclusive. Greenhouse plants can be forwarded with safety at any season, except the winter months, and even then if the conveyance is wholly by water. In addition to these, Specimens of Fruit Trees, Grapes, Vines, &c., can be transmitted from October to April.

Many persons are prevented from ordering trees, from a supposition that they will not bear distant transportation. An idea so extremely erroneous, that it ought to be exploded; the proprietors are in the constant habit of sending trees, and even the most delicate plants, to the remotest part of the Union with success, and they annually transmit large quantities to the different cities of Europe, where in some cases they have from 300 to 500 miles land carriage, after crossing the Atlantic. Persons sending orders, will please to state the extent of land and water carriage, and the articles will be packed accordingly. Precise directions should be given how the packages are to be marked, and by what route or conveyance they are to be forwarded, &c.

The packages will be forwarded by such route as shall be designated, and where the option is left to us, we will adopt such mode of transmission as shall be most economical and safe. During the winter, when the northern rivers and canals are frozen, all packages destined for the Western States can be sent by the way of New Orleans, or via Philadelphia or Baltimore, to Pittsburgh or Wheeling.

All catalogues may be obtained gratis by application direct to us. All orders for Fruit and Ornamental Trees, Greenhouse Plants, Bulbous Flowers, Dahlias, or Seeds, must be sent, post paid, direct to us, or through a regularly authorized agent. Every invoice transmitted by us will have a printed heading and our signature, to prove it genuine, and we assume no responsibility whatever, where such an invoice cannot be produced. We mention these cautions for good and conclusive reasons, knowing that we have been injured by deceptions, and we most particularly enjoin their strict observance on purchasers.

As many persons in the Union act as agents for different nursery establishments, it is particularly requested, that where orders are intended for us, it be plainly specified, but no person is to be considered as our Agent, unless he can produce
proof of the fact. It is expected that persons with whom no acquaintance exists, will, in forwarding orders otherwise than through an agent, designate some person in New-York who will be responsible for the payment, or tender a suitable reference, and a discount will always be allowed when cash or a draft at ninety days or less, on some city, is sent with the order. It is requested that those who, in sending orders, mention only the numbers by which the trees, &c., are enumerated in the catalogue, should be particular to state the edition from which they make their selections, as there are some numerical variations in the different editions. All letters requiring information will be promptly replied to, and the proprietors prefer that applications be made to them direct on every subject.

The postage of a letter is a trifling thing, but to one who receives a great number it becomes burdensome; persons are therefore desired to send their letters post paid.

N. B. It is expected that no persons having similar establishments will copy the different remarks attached to this catalogue, without crediting the source; as it would be extremely unreasonable that other persons should take upon themselves the responsibility for any errors which may have been inadvertently advanced by the authors of this publication.

**PRICES OF FRUIT TREES &c.**

The prices have been greatly reduced, in many cases 25, 33, and even 50 per cent. below former rates, and the average prices throughout the catalogue will be found as low, and in general much lower, than the same articles, equally genuine and of equal quality, can be obtained elsewhere.

Green House Plants, in assortments, will be supplied at lower rates than they can be obtained anywhere else in the United States.

Where ornamental trees of very large size are wanted for streets, avenues &c., or where fruit trees are wanted of extra size, they will be charged in proportion.

Crasane, thorn,
Colmar Dewitt, bonchretein,
German muscat, Virgouleuse,
Gilogile, Windsor.
CHERRIES. Cerisiers. *Prunus Cerasus,* 40 to 50 Cents.

* denotes fruit of large size.
† most esteemed for quality.
‡ best for tarts, wine and preserves.

**Note.**—The two classes of Cherries are thus distinguished—G denotes those of the Kentish or Griotte family, the trees of which acquire a medium height, with compact and spherical heads, and will sustain a severe northern climate. Those not noted, belong to the Heart and Bigarreau families, the trees of lofty growth and pyramidal form.

N. B. Trees of all kinds can be supplied suitable for dwarfs or espaliers.

---

PEACHES. Péchers. Amygdalus persica.

Price 25 cents each—$18 75 and $20 to 25 per hundred, according to the kinds and quality of the fruit, and the size and rarity of the trees.

The following peaches have been selected on account of their size, flavor or time of ripening, from among the best kinds imported from Europe, as well as from such as have originated in America.
† denotes those of large size. ‡ those of superior flavour.

C —— clingstones or pavings, and those not so designated are freestone, or melting peaches.

N. B. The names without numbers are synonyms of those which precede them.

Extra large sized trees suitable for immediate bearing can be supplied at 31 to 371-2

Also, the following fine new sorts lately received from England:

146 t Aiton's purple violet, $1 Aug 148 t Knight's early 50 cents do
147 t Dorsetshire Mignonnette, $1 do do do
N. B.—Trees of the different kinds can be supplied suitable for dwarfs or espaliers.
NECTARINES. *Brugnons. Amygdalus nectarina.*

31 to 37½ cents each—$30 per hundred.

N. B.—This fruit will succeed and produce well in any place where the peach does, if the directions are followed which are stated in the Treatise recently published; and as the varieties of this fruit are characterized by their beautiful transparent and waxen appearance, they may be ranked among the most admired appendages of the dessert.

**SCIONS, &c.**

Scions of Grapes of a number of the finest kinds, can be supplied if applied for in season, at from 5 to 12 dollars per 100, or in less quantities; but in no case will scions of any variety be sent to a less amount than the price of a vine; and of the very rare varieties three scions will be considered equivalent in value to a vine.

Scions of Isabella, Catawba, Alexander, and several other varieties of grapes, $15 to $20 per 1000.

Scions of all kinds of Fruit trees, suitable for grafting, will be supplied at 50 cents per dozen each scion suitable for three grafts, where the price of a tree does not exceed that sum; but where it does, the same price will be charged for the dozen scions as for a tree of the same kind; and in no case can a charge of less than the price of a tree be made for grafts of any variety, however few may be desired. But if 50 varieties are ordered they will be supplied for $15, and 100 varieties for $25. When a large number of scions are wanted of the more plentiful sorts of Fruits, they will be supplied by the 100 or 1000 at reduced rates. It is better that such orders be sent in the fall or winter.

Scions of Currants, Gooseberries, Raspberries, Berberries, Mulberries, Quinces, Figs, Poplars, Willows, &c. will be supplied at prices in proportion to their respective value; but no charge is made of a less sum than the price of a tree or shrub of the same kind.

Scions of the fine species of O-i ers, or Willows, most celebrated for basket-making, can be supplied, suitable for planting hedge rows, at from 3 to 5 dollars per 100, or 25 dollars per 1000.

Hawthorn for hedges, of the celebrated Washington Thorn, at 75 cents per 100, or 41 dollars per 1000. Do do extra large, 6 to 8 dollars per 1000.

Cockspur, or Newcastle Thorn, same prices as the preceding.

English hawthorn quicks, 75 cents per 100, and to 44 dollars per 1000. Do do extra large and strong, 6 to 8 dollars per 1000.
ESCUENT ROOTS.—FIGS.

Buckhorn, or Rhamnus catharticus, for hedges, 1½ dollars per 100.  
do large size, 6 dollars per 100.  
Yellow Locust, small trees for hedges, at from 4 to 7 dollars per 100.  
Osage Orange, or Maclura, for hedges, 20 to 25 dollars per 100.  
Chinese arbor vitae, small, for hedges, 12 to 15 dollars per 100.  
Privet, or prim, for hedges, 5 dollars per 100, 40 dollars per 1000, and smaller size 30 dollars per 1000  
Scions of do. 2 dollars per 100, and 15 dollars per 1000.  
Honey Locust, or Three thorned Acacia, (part thornless,) 5 to 10 dollars per 1000.  
Red Cedar, for hedges, 8 dollars per 100, or 60 dollars per 1000.

---

ESCUENT ROOTS, 6 c.

Asparagus, Common, per 100, 50 to 60 cents, and per 1000 $4.  
Ditto, 2 and 3 years old, 5½ to 6 dollars per 1000.  
Large Dutch, per 100 75 cts. to $1, per 1000 $6  
Ditto 2 and 3 years old, $7 per 1000.  
Artichoke, Jerusalem, per dozen 37 cents, per 100 2¼ dollars.  
Ditto, do New European variety, much superior, 75 cents per dozen, and 4½ dollars per 100.  
Green globe, per dozen 2½ dollars; per 100, 15 dollars.  
Cardoon, per dozen 2½ dollars; per 100, 15 dollars.  
Chamomile, double, each 25 cents; per dozen, 1½ dollars; per 100, 8 dollars.  
Horse radish, per dozen, 1¼ dollars; per 100, 4 dollars.  
Dyer's Madder, each 25 cents; per dozen, 2½ dollars; per 100, 10 dollars.  
Licorice, each 37 cents; per dozen 4 dollars.  
Hop roots, per dozen, 75 cents; per 100, 4 dollars; per 1000, 25 dollars.  
Sea Kale, per dozen, 2 dollars; per 100, 15 dollars.  
Rhubarb for Tarts, or Pie Plant, each 12 to 25 cents, according to age; per dozen, 1½ to 2½ dollars; per 100, 10 to 18 dollars.  
Raphontic, each 37 cents; per dozen, 2½ dollars.  
Palmated officinal, each 50 cents.  
Thick leaved, each 37 cents; per dozen, 4 dollars.  
True Medicinal, or Rheum australis, each 50 cents; per dozen 4½ dollars.  
Wilmot's early red, each 37 cents; per dozen, 4 dollars.  
Giant, or Goliah, each 50 cents.  
Early Tobolsk, each 37 cents; per dozen, 3½ dollars.

---

§ FIGS. Figuiers. Ficus carica.

The culture of this delicious fruit having recently become an object of particular attention, and requiring no more care as to covering in winter than the delicate kinds of grapes, the greatest pains have been taken to extend the collection by importations of the choicest kinds from the south of France, Italy, and elsewhere; and it now forms a concentration of this fruit unrivalled in extent and excellence.

Those marked * 50 cts. ‡ 75 cts. Those not marked are $1. By the hundred a discount of one-third in price will be made; and where 25 are taken 25 per cent. discount.

1 ‡Early Brown  
2 *Large late Brown  
3 ‡Large white  
4 *Ischia  
5 Marseilles, white or yellow  
6 *Brown Malta  
7 ‡Large blue  
8 Fine white  
9 Brunswick, or Madonna, fine  
10 Servantine
POMEGRANATE.  

The fruit requires in this latitude, that the trees during winter should be placed in a cellar, or some other place free from frost. South of the Potomac it is supposed they will not require that care.

103 t Splendid new scarlet
104 t Superb Vandesian

N. B.—Fifty new Chinese varieties have been recently imported, part of which are in the Greenhouse Catalogue.

ROSES. Rosiers. Rosa.

This favorite flower has been cultivated to such an extent in Europe, that it combines almost every tint of which nature is susceptible, and some of their collections contain above 1400 superb varieties. The following have been selected on account of their fragrance, size, beauty, singularity, or delicacy, and the original plants of many of the kinds cost from $1,50 cents to $4,75 cents each, exclusive of the expenses and losses attending importation. The collection occupies an acre of ground, where all the kinds are marked with their respective names, and during the period of their bloom, they present an accumulation of varied beauties scarcely to be rivalled, and those who may desire it, can make their selections when in flower. The various kinds of roses present, also, a great diversity in respect to height as well as other points, some being naturally of very tall stature, others of medium height, and others quite diminutive. All the following roses will endure the winters of any part of the Union without protection, with the exception of a few of the China roses. The culture of roses is of the most simple description, and information on that point will be found...
The different kinds of roses have been critically examined when in flower, and the remarks as to their qualities are the result of the personal observation of the proprietors. The roses are almost wholly on their own bottoms, a few of the most rare kinds only being inculcated, and the prices are lower than ever before offered to the public. Where a dozen plants are ordered, a discount of 25 per cent. will be made; where fifty, are ordered, 30 per cent., and to such nurseries as purchase an assortment of a hundred or more to revend, consisting of two or more of a kind, 35 per cent., and where two hundred or more are taken of those most plenty, and similarly selected, 50 per cent.

Those marked thus * are 25 cents each. † are 37½ cents each. ‡ are 50 cents each. Those not marked are $1 each.

The first section of Roses, extending to No. 495, is comprised of Double Roses only, except where otherwise mentioned and is a selection comprising such only as are beautiful and interesting.

1 †Admirable, extra superb
2 †Adonis, fine full red
3 †Favorite agate, agathe favorite, delicate blush
4 †Red agate, rouge agathe, bright red

Tree Roses.

These are budded on strong stocks 3 to 4 feet from the ground, and form fine heads. They present the appearance of trees in miniature, and bloom profusely. Above 75 varieties can be supplied, comprising many kinds of Chinese Monthly, Noisette Monthly, Damask Monthly, or Four Seasons, and superior sorts of Provence Roses, &c., prices from $1 to $1.50, and extra large plants $2 each.

China Roses.

The monthly varieties, when planted in the open ground, are particularly interesting, on account of expanding their flowers in March and April, when those of other kinds have not yet made their appearance. They continue to bloom throughout the summer; and in the autumnal months their numerous flowers also afford particular gratification, as nature then seems most to need their cheering influence. Nearly the whole number support our winters with little or no protection; those most tender need only have a box or barrel placed over them during winter. Where any kinds are designated as climbers, it is meant that they grow tall, and are suitable for training, &c. The soil most appropriate is a sandy loam.
**Chinese Ever Blooming, or Daily Roses.**

These require a slight protection during the winter in this latitude.

PRÉONIES. Pivoines.

No class of flowers has lately attracted more attention in Europe than this, a memoir of which has been published in London. Every variety will support the winters of the United States and Canada. Most of the varieties are extremely splendid, and others possess striking peculiarities. Anticipating that a similar taste would be evinced in this country, the proprietors have, by great exertion obtained every variety possible.

N. B. The selections of the above assortments must be mostly left to the proprietors.
CARNATIONS. Oiellets doubles. Dianthus caryophyllus.

This most interesting class of flowers, which so deservedly commands universal admiration, has received particular attention; and the entire collection now comprises the most rare and superb varieties. It may be well to remark, that sometimes a branch, or even a whole plant, may vary the color of its flowers; but this it not very frequently the case.

Those marked thus $ are 25 cts each. * are 37½ cts each. † are 50 cts each. ‡ are 75 cts each. Those not marked are $1 each. § denotes those whose flowers are rose-leaved.

**CHINESE CHRYSANTHEMUMS.**

This superb flower (often denominated Artemisia) is deservedly esteemed; being perfectly hardy, and affording a most brilliant display, at a period when the chilling blasts of autumn have left us but the vestiges of departed verdure. It is, therefore, a circumstance particularly gratifying to us, that we are now enabled to offer all the Chinese varieties, and also the new French varieties.

Those noted thus * are 20 cents. † 37 cents. ‡ 50 cents. Those not noted are 75 cents each.

An assortment of 12 kinds, $2.25—do 24 do, $4.25—do 36 do, $6.50—do 50 do, $12.

---

*Iris, or Fleur de Lis.*

This flower, from its great combination of colors, (whence it derives its title,) and altogether unique appearance, has ever found admirers among the curious and the scientific. It is also the court flower, or emblem of the Bourbons. In addition
to these here enumerated, there are about 70 beautiful bulbous varieties, for which see catalogue of bulbous flowers.

Those not marked are 25 cents each; those marked thus * are 37 cents, and thus:

50 cents.

DAHLIAS.

The new catalogue of this magnificent flower is now ready for distribution comprising all the new varieties, many of which are superbly striped and variegated. Those who desire assortments will be supplied at lower rates than they can be obtained elsewhere, and 10,000 roots are now ready for delivery, comprising above 500 varieties, of which a specimen bed, containing an acre, is annually formed for the inspection of visitors. The collection is the most extensive in America, and for particular details and descriptions, as well as directions for the culture, see Catalogue of them. Those who order assortments of Dahlias should name the kinds they already possess, in which case, those varieties will be omitted. The selection of the assortments is to be made by the Proprietors. The prices are rated lower on account of their retaining the privilege of sending such as they have the largest stock of; but, in doing this, the purchaser receives quite as beautiful varieties as he could select himself, and at very reduced rates. It is the determination of the Proprietors, that their customers shall be supplied, in all cases, on the most favorable terms.

Dry roots can be supplied from October to May, and they will be packed so as to be transported safely to any distance.

Selections made by the Proprietors as follows:

Superb double varieties, 75 cts each.
Double varieties of kinds less rare, each 25 to 50 cents.
Very superior new kinds, each $1 and upwards as per catalogue.
Some very superior new kinds, $3 to $10 per doz. including many that are usually sold at very high rates.
Very fine assorted kinds, per dozen, each a distinct named variety, $6.
Fine do do do but less rare, $4,50
Assortments, do do of the older varieties, $3.
Mixed double varieties, $2,50 per dozen.
Double Dahlias by the 100, 200, or 300, or more varieties, will be supplied at very low rates, and for the terms see Dahlia Catalogue.

BULBOUS AND TUBEROUS ROOTED FLOWERS.

The assortment of this delightful class of Flowers is the most extensive in America, and a distinct Catalogue is published, comprising all the different classes and varieties, in which they are priced at very low rates, and to which please refer.
GREEN HOUSE PLANTS.

A new Catalogue with very reduced prices, has just been published, and the whole collection has undergone a complete revision, and a great number of new, rare, and beautiful species have been added thereto.

Greenhouse plants will be supplied in assortments of 25, 50, or 100 or more pots, each a distinct species or variety, at very reasonable rates, and such omitted as the applicant already possesses.

NEW CATALOGUES, with reduced prices, which are distributed gratis, on application, post paid.

No. 1. Fruit and Hardy Ornamental Trees, Shrubs, and Plants, pp. 72.
5. A Catalogue of Garden, and Flower Seeds with retail prices, and wholesale prices to venders.
6. Do do do in French.
7. A Catalogue of Double Dahlias, comprising the most splendid varieties.

BOOKS.—Prince's Treatise on Horticulture. - - - - 75 cents
Prince's do on the Vine. - - - - $1.50
Prince's do on Fruits, or Pomological Manual, containing accurate descriptions, in detail, of about 800 varieties of Fruits, in 2 vols., $2

The Books and Catalogues can be transmitted by mail at a postage of 1½ to 2½ cents per sheet.

SELECTIONS OF FRUITS.

The following selections of fruits of kinds best known, are well calculated for garden and orchard, where only a limited number is required, and it may aid those who are not acquainted with the subject. The numbers refer to the enumeration in the Catalogue.

The trees we can furnish, by selections, from our immense stock, will average from 25 to 33 per cent. better in point of size and vigor than such as are usually sold. Some persons complain that Pear trees do not succeed, which arises in most cases from an improper selection of the varieties.

For the Northern States, the Flemish and other varieties of Northern origin should be selected; and for the South, the Spanish and Italian varieties, and those from the southern part of France should be selected. Cherries, Peaches, Nectarines, Apricots, &c., should be selected of such varieties as have originated in, or become acclimated to a corresponding climate to that for which they are intended.

CHERRIES.—Twenty varieties. 1, 2, 3, 6, 7, 11, 16, 17, 18, 24, 26, 29, 36, 39, 52, 54, 55, 62, 72, 91.

PLUMS.—Twenty-five varieties. 1, 4, 5, 10, 12, 25, 32, 33, 35, 43, 44, 45, 60, 67, 75, 78, 89, 95, 98, 101, 122, 135, 144, 147, 148.

PEACHES.—Thirty varieties. 7, 9, 10, 11, 12, 13, 17, 18, 20, 22, 25, 32, 38, 40 41, 44, 47, 50, 56, 59, 74, 76, 83, 117, 130, 131, 132, 137, 140, 142.

NECTARINES.—Twelve varieties. 2, 8, 12, 21, 26, 27, 31, 32, 33, 36, 38, 41.

APRICOTS.—Ten varieties. 1, 5, 11, 13, 17, 20, 25, 27, 33, 35.
